The obvious choice when you're looking for style, convenience and performance in your new windows. We've combined classic looks with innovative technology that can all be found in our double hungs, picture windows, sliders and bay windows.

**Advanced Window Systems, LLC**

# Built with Performance & Style

Our UltraTite window line offers the ultimate balance of energy savings, beauty and performance to replace your old windows. Filled with standard features that others offer as upgrades, this window line is in a class of its own providing style and engineering excellence for strength and performance.

All of our replacement windows feature fusion welded virgin vinyl frames and sashes. The unique beveled frame adds a clean appearance, while the welded corners offer additional air and water tight barriers for further energy savings.

## Features & Details

- Heavy duty fin seal woolpile reduces air, water and noise infiltration.
- Triple sealed head and sill design prevents interior water leakage and air penetration.
- Extruded inter-locking system and heavy duty lock and keeper pulls sashes together tightly.
- Standard dual pane 7/8" insulated glass provides year round comfort.
- Optional energy efficient LowE Glass and Argon Gas for superior energy savings and lower heating and cooling costs.
- Locking half-screen included. Full screen available.

**Double hung windows offer a tilt-in top and bottom sash offering easy cleaning from inside your home.**

Double cam-action locks found on all window widths over 25 3/4"

Heavy duty double wall lift rails make it easy to open and close the sashes.

Shark fin tilt latches.

Heavy duty night latches provide added security while providing ventilation.

# Styles

## Bay

Add a panoramic view and increase the sense of openness to any room. A bay window is usually composed of three individual windows; the center fixed picture window and either two double hung or casement flankers offering a look from contemporary to colonial.

## Slider

Each of our slider windows feature clean lines offering a streamlined look. An advanced track system allows the sashes to glide smoothly, making them easy to operate.

- Support bar provides added strength to the frame and prevents sagging
- Brass rollers offer smooth and easy operation
- 2 or 3-lite units are available

## Options

### COLOR

### SCREEN

Optional UltraVue Screen provides clarity and more light through your windows.

### BLINDS

Providing privacy and light control, privacy blinds between the glass are available in tilt-in only.

**Note:** Blinds available in Double Hungs and Casements.

### GLASS

#### LowE Glass

This energy efficient glass is designed to reflect heat, keeping your home warmer in the winter and cooler in the summer months.

#### Argon Gas

190 % more dense than air, slows down the movement of the air within the airspace reducing the transfer of heat to cold for improved energy efficiency.

#### Obscure Glass

Textured glass that adds privacy where needed.

### FOAM

Foam filled sashes and frame increase the insulating value while improving the overall U-Value, enhancing condensation resistance and frame rigidity.

### GRIDS

#### Grids Between the Glass

Available in contour or flat, grids are placed between two panes of insulated glass, making cleaning a snap.

#### SDL Grids

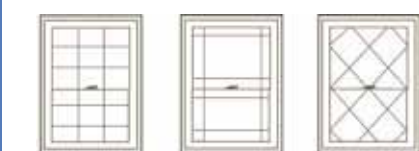

Grids are placed on the outside of the glass offering the traditional look of panes of glass.

#### Pencil Grids

Select from nickel or gold-tone to create a classic look. All grids are sealed between the glass, making the glass easy to clean.

#### Grid Patterns

Colonial

Prairie

\*Diamond

\*Diamond grids only available in flat or contour grids
